

AMENDMENT OF CLAIMS UNDER PCT ARTICLE 34(2)(b)

5 1. (Amended) A reflecting film comprising a layer B that
contains rutile type titanium oxide and a layer A that
contains fine powder filler other than rutile type titanium
oxide, wherein the rutile type titanium oxide has a vanadium
content of 5 ppm or less, and wherein the layer A is positioned
10 outermost on the side of a surface used for reflection, each
of the layers A and B has voids formed by drawing and is
independently formed from a resin composition containing
a thermoplastic resin, and the thermoplastic resin is an
aliphatic polyester.

15

2. The reflecting film according to claim 1, wherein the
reflecting film has a two-layer construction including the
layer A and the layer B, or a three-layer construction
including the layer A, the layer B, and the layer A in this
20 order.

3. The reflecting film according to claim 1 or 2, wherein
the aliphatic polyester is a polylactic acid based resin.

25 4. A reflecting plate for a liquid crystal display device,
wherein the reflecting plate for a liquid crystal display

device comprises the reflecting film according to any one of claims 1 to 3.
